

New Product Launches

IME 2023
International Mining, Equipment & Minerals Exhibition

November, 6-9 2023
Eco Park, Rajarhat, Kolkata, India

Company Name	ElectroZavod (India) Pvt. Ltd
Stall Number	M056
Product Name	Flip Flow Screen
Product Features	High screening capacities Screening of agglomerates with high moisture content Indigenously manufactured Custom designed to suit each application
Product Pictures	

**Brief about the product
(maximum 100 words)**

Flip flow screens" are a type of screening technology used in material processing and sorting. They designed to handle difficult-to-screen materials with high moisture content, clay, fines, or sticky particles that may tend to stick together or clog traditional screening equipment

Key features and benefits of flip flow screens include:

- Anti-Clogging
- High Screening Efficiency
- Versatility
- Low Maintenance
- Screening Precision
- Environmentally Friendly

These screens find applications in mining, steel, cement and more. They can be used to separate, classify, and sort different materials based on size or other characteristics.
