

IME 2023

International Mining, Equipment & Minerals Exhibition

November, 6-9 2023

Eco Park, Rajarhat, Kolkata, India

Company Name	Shandong Jinhengli chain group Co.,ltd - RUP
Stall Number	Y -114
Product Name	Mining chain
Product Specifications	26x92: test load: 680kn breaking load: 850kn weight: 13.7kg
Product Pictures	

<p>Brief about the product (maximum 100 words)</p>	<p>The company's products use high-quality steel 23MnNiMoCr54, and after special heat treatment, the product performance far exceeds the national standard C-grade. With the characteristics of super wear-resistance and high tension, it is specially used to overcome the harsh environment such as fault rock and large dip Angle.</p> <p>The products are paired in pairs, and the surface of the chain is treated with anti-corrosion treatment to achieve a certain degree of anti-corrosion function; The chain can be matched with your equipment, which can safely and effectively ensure the coal output in the mine.</p> <p>Our company has passed the ISO9001:2008 quality management system certification.</p>
