**Brief about the product
(maximum 100 words)**

The PA model pinch valve is a heavy-duty enclosed construction full bore valve that employs elastomer sleeves for flow shut-off and control in applications with abrasive and corrosive slurries. The sleeve is the only part in contact with the media, no other mechanical parts are required, and it is a maintenance free part. The PA pinch valve is mainly used in industries such as:

- Mining • Chemical plants • Pulp and paper • Power plants • Wastewater treatment • Cement and ceramic Etc.
